Technical Toolkit

Frontend: React, Redux, GatsbyJS, Material UI, React Hooks, JavaScript, ES6, Bootstrap, SCSS, HTML, CSS, jQuery

Backend: REST, NodeJS, Express.js, MySQL, PostgreSQL, MongoDB, Swagger, PHP

Unit Testing: Jest, Supertest

Other: Team player, Fast learner, Git, GitHub, Unit testing, OOP, CI using GitHub actions, ESLint

Experience, Education & Projects

PHP Developer Internship @ Applesoft, 2021 July – 2021 September

PHP, MySQL, Bootstrap, jQuery, AJAX

- Worked on legacy code to fix bugs and add features.
- Added functionality to update specific elements on the page (Keep the navbar and sidebar then update the content using AJAX and jQuery depending on the Query string).
- Making suggestion to make the code structure cleaner and more maintainable.
- Contributing in getting the client's requirement and figuring out best database models.
- Making suggestion to refactor the base code.

Drawing Application Mintbean Hackathon.

React, Redux, Material UI, React-Router, Axios, Express, NodeJS, MongoDB, JWT, Swagger UI, Jest, CI Using GitHub Actions, CSS

- A full stack application that allows user to draw.
- It allows users to register/login.
- Users can draw and their drawings would appear on the home page.
- Users can Like the drawings of others.
- Each User has a profile that shows his drawings.
- Each endpoint was tested and a CI was made using GitHub actions.
- Top 16% Developers.

Pokemons Wallet Application

React, React Hooks, Material UI, React Router, Axios

- A react application Using pokemons-api.
- Search pokemons by name and filter them by type.
- Save your favorite pokemons in your wallet (Localhost).

Education

- Currently studying civil engineering 3rd year.
- FreeCodeCamp and Fullstack-Open.

- Coursera.

Certifications

- Responsive Web Design freeCodecamp.
- Web Design for everybody Specilization (Coursera).
- JavaScript Algorithms and Data Structures freeCodecamp.
- Database Design and Basic SQL in PostgreSQL.
- Intermediate PostgreSQL.
